Boston anthracite coal was not in common use, if it was in use at all. In certain sections of city there were wood stands, where people from the country, coming into rown with a load of wood, waited for customers. The best of hickory brought \$8 a cord, which is about the price of the best wood at the present day, though that of inferior the common objects and in the bottom try to awaken Sunday morning and find the whole city on the qui vive-of expectation and of busy preparation for a carnival. The day was beautiful, the heat of a trepical sun being tempered by a fresh breeze, and the weather not uncomfortable until midday. The storea were open, the cafes were swarming with people, and there were not uncomfortable until midday. The storea were open, the cafes were swarming with people, and there were not uncomfortable until midday.

quality was sold at a lower rate. Such a thing as a cook stove was lardly known, and all the cooking was done with wood in an open fireplace. Biscuit and loves were biked in a bake kettle, which had a cover with a rim around it, so that coak is hot ashes could be put on it. In hotels and large private houses meats and poultry were roasted before the fire. A 'smoke jack' was used in the former and it did its work a great deal better than any oven can do it. Roast beef and roast turkey at the present tige are mismomers, as a rule for they are really baked.

THE SMOKE JACK.

My young friends, and very likely many of my older oras, do not know what a smoke jack is, and I have not seen one for forty years, though possibly

loaf in it. The cover was inclined down from the tire, so that it would reflect the leat upon the bread. This and the tin kitchen did their work very well as long made their appearance—a magnificent lead posting succession; but the vestigating all the phases of society as seen in Caba on this festive occasion, and the affair was kept up long after I had been tread of what I had noticed to be succession. heat upon the bread. This and the un Mignificent kitchen did their work very well as long made their appearance—a magnificent had noticed more to commend, but I with the property of the prop kitchen did their work very well as long as open fires were available, but of course at much greater expense for fuel. The cook stove has nearly superseded all these appliances, though the old ladies of sixty the inexorable critic merely said. "Fine loving father of Frederick the Great; but the inexorable critic merely said." Fine soldiers, but not tall enough."

appliances, though the old ladies of sixty years ago fought against it for a time as a senseless innovation; but they learned to use it and like it in the eard. At first wood was generally used in it, but when hard coal came into general use it was the fuel generally used in it, but when hard coal came into general use it was the fuel generally used in cooking. This coal had a hard struggle to obtain a footing in houses in those days. My father hired a new man from the country and fold him to make a fire in the morning in the grate. When we got up there was no fire. The man had "given it up."

He could make a fire, but well used in cooking the could not do it with stones. Gas was in fise at trist time, but I used to be amused at the comments of people from the country open the lights in the office of the horiswhere I was brought up. They all wanted to know what it was that-burned, it was all re of in the form of air, but they would not believe it was thra-burned. It was all re of in the form of air, but they would not believe it, and evidently about it. The man lifet, and evidently about it. The man lifet when the country of the form of air, but they would not believe it.

I can remember when I was all of of in the form of air, but they are now a receive the form of air, but they would not believe it.
